

Commercial proposal for the installation of a video surveillance system (on-line)

Our company offers free installation and connection of the video surveillance system:

- the system works in color image and in night vision conditions;*
- all equipment is provided by the service provider company;*
- the equipment works in the IP video signal transmission system - which makes it possible to observe the territory from anywhere in the world (if the Internet is available);*
- the system works in the presence of electricity and the Internet with a static IP address.*

Subscription fee for the service is UAH 450/month from one video point (video camera).

The subscription fee includes:

- a) maintenance;*
- b) technical support for the functioning of the complex;*
- c) record storage for 12-14 days and provided to the client free of charge;*
- d) the possibility of outputting a video signal to the Customer's device (phone, computer).*

The following equipment is used to provide this service:

- a) IP video camera (such as Tecsar, Hikvision)*
- b) Routers, switches, etc.*
